Professional Summary

AWS Certified Cloud Practitioner and BS Information Technology graduate with hands-on experience in software development, quality assurance, automated testing, Node.js, TypeScript, REST APIs, CI/CD, and cloud infrastructure. Experienced in functional testing, defect identification, test validation, backend development, deployment automation, and production troubleshooting. Familiar with Jest-based unit testing, integration testing, API testing, mocking and test validation practices, and incorporating automated tests into CI/CD workflows. Practical AWS experience with S3, Lambda, DynamoDB, SQS, EventBridge, EC2, VPC, IAM, and CloudWatch. Comfortable using AI coding assistants to break down development problems, generate test cases and code stubs, and iteratively validate implementations against requirements.

Technical Skills

Programming: TypeScript, JavaScript, Node.js, Python, PHP, SQL

Testing & QA: Jest, Unit Testing, Integration Testing, API Testing, End-to-End Testing, Functional Testing, Regression Testing, Test Case Design, Test Validation, Mocking/Stubbing, Bug Tracking, Test Data Validation

Backend Development: Node.js, Express.js, REST APIs, Authentication, Authorization, JWT, API Integration, Error Handling

AWS Cloud: S3, Lambda, DynamoDB, SQS, EventBridge, EC2, VPC, IAM, CloudFormation, CloudWatch, CloudTrail, Security Hub, GuardDuty

CI/CD & DevOps: GitHub Actions, Jenkins, Docker, CI/CD Pipelines, Automated Testing, Deployment Automation, Nginx, Linux

Databases: PostgreSQL, SQL Server, MongoDB, DynamoDB, MySQL

Frontend: React, Next.js, Angular, HTML, CSS, Tailwind CSS

Development Tools: Git, GitHub, Postman, AI Coding Assistants, Vercel, PM2

Monitoring & Troubleshooting: CloudWatch Logs, Log Analysis, Application Monitoring, Root Cause Analysis, Linux Server Administration

Methodologies: Agile Development, Test-First Development, CI/CD, Code Review, Technical Documentation, Software Quality Assurance

Certifications

AWS Certified Cloud Practitioner <i>Amazon Web Services</i>	Jan 2025
Cisco CCNAv7: Switching, Routing, and Wireless Essentials <i>Cisco Networking Academy</i>	Dec 2024
Cisco CCNAv7: Introduction to Networks <i>Cisco Networking Academy</i>	Jun 2024
Cisco Introduction to Cybersecurity <i>Cisco Networking Academy</i>	Dec 2024
AWS Cloud Foundations <i>AWS Academy</i>	Nov 2024

Professional Experience

Software Engineering Intern <i>Skydev Solutions Inc.</i>	Feb 2025 – May 2025
– Started as a Quality Assurance Engineer performing functional testing, test validation, defect identification, regression testing, and production-level software quality checks. – Designed and executed test scenarios to verify application functionality, identify defects, validate fixes, and ensure software behavior matched expected requirements. – Collaborated with software engineers to reproduce, document, and track defects while providing detailed findings to improve application reliability.	

- Promoted to the Software Engineering team after one month based on performance and project contributions.
- Developed and enhanced production frontend and backend features using modern web technologies while validating functionality through automated and manual testing practices.
- Worked with JavaScript/TypeScript-based applications and backend services, gaining practical experience with API behavior, application logic, data validation, and error handling.
- Contributed to CI/CD initiatives using GitHub Actions and Google Cloud Platform, integrating automated workflows into the software development lifecycle.
- Participated in code reviews, debugging, issue investigation, and collaborative technical discussions within an Agile development environment.
- Performed application troubleshooting and analyzed logs to identify failures and validate fixes before deployment.

AWS CC PH Mentee

Dec 2024 – Present

AWS Cloud Club Philippines

Remote

- Gained practical experience with AWS services including S3, Lambda, DynamoDB, SQS, EventBridge, EC2, VPC, IAM, and CloudWatch through cloud learning projects and hands-on exercises.
- Worked with serverless architectures using AWS Lambda and explored event-driven application patterns using SQS and EventBridge.
- Practiced storing and retrieving application data using DynamoDB and object storage using Amazon S3.
- Used CloudWatch Logs and monitoring capabilities to investigate application behavior, identify operational issues, and troubleshoot cloud workloads.
- Applied AWS IAM and VPC fundamentals when configuring cloud resources and isolated development or testing environments.
- Created technical documentation for serverless and cloud monitoring solutions, improving implementation consistency and knowledge sharing.

IT Intern

2023

Commission on Elections

Olongapo City

- Developed a Java Swing application for inventory tracking and voter record management.
- Assisted IT staff with secure data handling, system validation, troubleshooting, and maintaining system integrity.

Projects

CurioDocs: Collaborative Document Workspace

Jun 2026 – Present

Node.js, TypeScript, React, AWS S3, CloudFormation, Docker, Jenkins, GitHub Actions, Nginx

- Designed and deployed a cloud-hosted SaaS platform using Node.js/TypeScript, AWS S3, CloudFormation, Docker, Nginx, and HTTPS.
- Developed backend functionality and REST APIs using Node.js while implementing authentication, authorization, validation, and error-handling practices.
- Integrated AWS S3 for secure application file storage and retrieval.
- Used AWS CloudFormation to define and provision cloud infrastructure through infrastructure-as-code, improving deployment consistency and repeatability.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions to automate application builds, testing, and deployments.
- Containerized backend services with Docker to provide consistent development, testing, and production environments.
- Performed application troubleshooting, log analysis, API validation, and deployment verification on Linux and AWS EC2 infrastructure.

Provident Loan System: DepEd SDO Accounting Platform

Apr 2026 – Present

Next.js, Node.js, Docker, SQL Server, REST API, JWT

- Collaborated on a transaction-based backend system requiring reliable data processing, validation, authentication, and accurate business logic.
- Implemented and maintained REST API functionality using backend services and SQL Server while focusing on data integrity and reliable application behavior.
- Implemented JWT authentication, Argon2 password hashing, and role-based access control for secure API operations.
- Used Docker to maintain consistent development and deployment environments.
- Performed API validation, debugging, and application troubleshooting during development and deployment.

Smile: Appointment Management System

Sep 2024 – Present

Next.js, Node.js, Express, MongoDB, AWS, GitHub Actions, Nginx

- Developed a Progressive Web Application for appointment scheduling and patient record management using Next.js, Node.js, Express, and MongoDB.
- Designed and implemented REST APIs for appointment, user, and record management with validation and secure data processing.
- Performed API testing and functional validation to verify backend endpoints, request handling, authentication, and expected responses.
- Implemented CI/CD pipelines using GitHub Actions to automate application builds, testing, and deployment workflows.
- Configured Nginx as a reverse proxy and performed application monitoring, troubleshooting, and deployment verification.

Gordon College Alumni Connection and Organization

Jan 2024 – May 2024

PHP, Angular, MySQL, REST API

- Developed a full-stack web application using Angular and PHP REST APIs with MySQL for persistent application data.
- Implemented authentication, API integration, input validation, and email notification functionality.
- Performed functional testing and validation of frontend workflows and backend API responses.

ChatMe: Realtime Chat Application

May 2024

PHP, Angular, MySQL, Pusher

- Built a real-time chat application using Angular, PHP REST APIs, MySQL, and Pusher.
- Implemented and tested REST API functionality, authentication, user sessions, and real-time messaging workflows.

Leadership & Achievements

Hack4Gov 2 & 3 – Region 3 CTF Competition

2nd Runner-Up – DICT-organized regional Capture the Flag competition; performed Blue Team defense and digital forensic challenge

AWS Learning Club GCCCS – Chief of Finance

Organized AWS learning events and cloud technology workshops for student members.

GCCCS ELITES Organization

Vice President for Internal Affairs and Public Information Officer.

Education

Gordon College

Olongapo City

Bachelor of Science in Information Technology

Sept 2022 – July 2026

- Cum Laude
- Programmer of the Year
- Excellence Award

St. Nicholas Academy

Castillejos, Zambales

Technical Vocational Track: Home Economics

2020 – 2022
